# A CONVERSATION OF HOPE

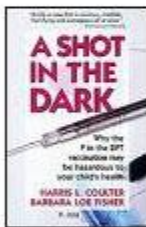

WITH HOST *Teri Arranga*

Autism One Radio

TUESDAY OCTOBER 28TH 2008 AT 9AM PACIFIC (12PM EASTERN)

## Three Generations of Sorrow: Vaccine-Induced Autism, Chronic Disease and Disability, SIDS, & Parents' Right to Choose

On October 16th the Vaccination Choice Rally, organized by Louise Kuo Habakus and the NJ Coalition for Vaccination Choice ([www.njvaccinationchoice.org](http://www.njvaccinationchoice.org)), was held in Trenton, NJ. Barbara Loe Fisher, President and Co-founder of the National Vaccine Information Center ([www.NVIC.org](http://www.NVIC.org)) looked out over three generations. The NVIC was founded in 1982 and her book, *A Shot in the Dark*, was published almost two decades ago. Barbara will detail the science with regard to how bioactive pertussis toxin and endotoxin, as well as other potentially toxic ingredients, could contribute to developmental delays. Barbara will talk about infectious diseases and describe the rise in chronic disease and disability in children the past 25 years as the number of doses of vaccines more than doubled. Louise Kuo Habakus is concerned about both the ethics of mass- and forced-vaccination policies and how citizens can develop grassroots movements to maintain health-freedom rights for themselves and their children.
